

Part Time I Documentation

Summary: This document contains the information regarding your part time job in a company during your 42 curriculum, after the common core.

Contents

I	Overview	2
II	Legality questions	3
III	Pedagogic part	4
IV	Corporate Relations Team	6

Chapter I

Overview

A good professional integration remains one of the fundamental objectives of the school. The curriculum is designed to put you in a businesslike situation, but nothing will match the business experience itself. This is why we wish to enhance to a certain extent the approach of students who engage in a part-time professional activity in parallel with their curriculum, via a dedicated project.

This part-time project meets the following guidelines:

- This project usually takes longer to complete than a regular internship project. You can concatenate multiple missions in different companies, with pauses between, up to an equivalent duration of 6 months full-time.
- Specific registration rules can apply locally on your campus. Check the intra.
- The validation is different. Each mission will give you a certain percentage for the team grade. All team grades will sum up to create the final grade of the project.
- You cannot cumulate more than 130 days in total for the intranet. Your grade won't go up if you go above.

There are two evaluations during your part-time that will be sent to your referent:

- The first, mid-term evaluation, will be sent halfway through your work period.
- The second, end of course evaluation, will be sent one week before the end of your work period.

If you have signed an open-ended contract, you still need to set an end date for this project, in order to get a grade. Generally, it is recommended that you specify a duration of 900 hours for a unique part-time mission covering the entire project.

This last evaluation will authorize you to subscribe to the peer-video project.

Chapter II

Legality questions

For reasons of legality, you can not start working if your contract is not signed. For internship agreements involving your campus, it also must be uploaded on the intranet. If you bypass this important rule, you will not be covered by any form of social protection and you will be considered to be working illegally. No need to remind you that this should not happen.

Chapter III

Pedagogic part

This Part Time allows you to realize your capacities in a real environment, it increases your experience on the different aspects of cursus (technical, organizational, relational) but also on elements more related to the understanding of the context of the company, business, issues... It is also an opportunity for those who have little or no professional experience to start filling in their CV, thus facilitating their integration at the end of the cursus.

Current conditions are:

- Successfully complete the **Common Core** part of the cursus.
- Not ongoing professional experience project (like **Internship I**, etc...).

It is usually recommended to do the **Internship I** project before a part-time. A typical situation is doing this part-time project after the internship project, in the same company. This allows you to progress into your curriculum on one side, and earn money, improve your résumé and experience, on the other side.

Please note that the Part Time project is not retroactive.

Since this is an element of your career, this Part Time includes an evaluation. On one hand, the training supervisor completes a mid-term evaluation and a final evaluation, on the other hand, the peer correcting applies on the rendering of each: a video presenting the Part Time period, uploaded on a website like Dailymotion or YouTube, etc... and whose link is in a file "video" on your rendering git.

You have to present in this video what happened during your Part Time, in 4 to 5 minutes. It must contain a presentation using the tool of your choice (Powerpoint, Keynote, Prezi, ...), as well as a miniature inlay of you, at least in bust, even standing. An intro / conclusion where only you appear is possible. This video must have the professional side of a presentation to the board of directors of a large company. As much for the quality of your slides, your outfit, as the quality of editing and production. The content will follow some rules :

- There is a new board member: you will have to explain the overall context of the company, the particular context, the issues, the content and the results of the project(s) you did during the Part Time. The new member, without a corporate culture, needs to understand what you are explaining.
- Seeking to promote people, the board is there to listen to YOU. It is your personal involvement in the project, your qualities, both technical and managerial (if applicable) that interest them. It's up to you to convince them.

Chapter IV

Corporate Relations Team

The Corporate Relations team of your campus is there to ensure the connection between students and companies. It intervenes on several levels.

First, it acts to facilitate the search for jobs by students (without doing students' job). This translates into an approach with the school's partners to promote the submission of job offers by companies. Also, conferences and workshops to form the good approach to the elements which constitute this research are proposed (CV, interviews, ...). Finally, Meetups or other events are proposed to put students in direct contact with companies looking for trainees.

Whatever the type of contract used for your Part Time (Part Time agreement, fixed-term contract, open-ended contract ...), you must provide information about your Part Time (company details, legal status and Part Time topic) by completing the form on the intranet in the Companies section and uploading your signed contract. It is important to respect these instructions, they allow us to make a good follow-up of students in training or at school.

Finally, the Corporate Relations team is there to serve as a link with the school during the Part Time. In case of problem, doubt, question, address the Corporate Relations team. We can both advise you, but also call you to order if necessary. Respect and trust between you and your company must work both ways. For example: the company must ensure correct working conditions. On your side, behavior, punctuality, must just as much meet expectations. Also, any contract signed is a legal commitment on your part. You can not stop an Part Time because you do not like it, but only when the terms of the contract are not respected. The list is long, but you understand the main idea: be pro.

The entirety of these elements will be taken into account for the validation of your Part Time.
